

SECURE AI AUTOMATION

Give repetitive work to AI. Keep control.

Digital Employees handle routine work while your team stays in charge and your data stays private.

tabirianalytics.com

01 THE OPPORTUNITY

Free your team from repetitive, high-volume work.

We automate routine work while keeping sensitive information under your control. This gives your team more time to use their skills and judgment to help your business grow.

02 WHAT YOU GET

More capacity. Less busywork.

Handle routine work

Digital Employees process documents, service requests and operational tasks.

Prepare work for review

They organize evidence, verify information and produce review-ready output.

Escalate what matters

Your people retain approval, judgment and customer relationships.

HOW WE START

- 1 **Choose** one high-value workflow
- 2 **Secure** the data and permissions
- 3 **Deploy** with your team in control

Built by cybersecurity and AI leaders

With research roots at Carnegie Mellon University.

03 PRIVATE BY DESIGN

Your data stays yours.

- ✓ **Private deployment**
Your data stays within your organization.
- ✓ **No public model training**
Your information is never used to train public models.
- ✓ **Human approval**
Your team owns decisions and escalation.

04 PROOF IN PRACTICE

REGULATED FINTECH • AGENTIC SECOPS

24-hour roadmap for live payment security

<2 hrs to expose a critical risk	30 Mins mean time to detection (MTTD)	14x faster delivery than manual processes
---	---	---

CIVIL RIGHTS • LEGAL OPERATIONS

From raw evidence to court-ready work

500+ documents organized	30+ recordings transcribed	100% only approved legal databases cited
------------------------------------	--------------------------------------	--

05 YOUR NEXT STEP

Start with one workflow.

Talk with our team about where secure automation can have the most impact.
